

Take collaboration up-a-notch with Hosted Exchange from TSR Solutions.

At TSR, we understand that technology is not your core business. Let TSR provide your business with secure email, calendaring and scheduling, shared contacts and task management. In addition to the lower cost and near-100% guaranteed uptime, you can improve collaboration across your organization through more effective and efficient communications.

Why Outsource Your Exchange with TSR Solutions? 3 Reasons...

1. **Cost** – the cost of running a Microsoft Exchange server 'in-house' can be in the 5-figures, PLUS staff time to maintain the server. TSR will manage your technology for a small monthly fee.
2. **Business Focus** - Exchange email outsourcing allows your IT staff to focus on your business, not whether your email is performing up to standards.
3. **Safe, Secure** – not something you "hope" to have, rather something you absolutely must have, and with TSR's hosted Exchange solution your information assets remain safe, secure and always available.

Summary

Through TSR's Managed Exchange Server, your company can benefit from powerful Business Email and Collaboration for a low monthly fee. Our 99.99% uptime guarantee and 24/7/365 world-class support from our Microsoft Certified staff makes outsourcing Microsoft Exchange from TSR Solutions a great choice for your organization.
